Introduction to Microsoft's Cloud Services

Microsoft Is Known for Many Products

Windows

Microsoft 365 Apps
(MS Office)

Office 365

Azure

Dynamics

Xbox

Four Cloud Platforms for the Enterprise

Microsoft Azure

The Azure cloud platform is more than 200 products and cloud services designed to help you bring new solutions to life—to solve today's challenges and create the future.

Microsoft 365

Microsoft 365 is designed to help you achieve more with innovative Office apps, intelligent cloud services, and world-class security.

Dynamics 365

Microsoft Dynamics 365 is a product line of enterprise resource planning (ERP) and customer relationship management (CRM) intelligent business applications.

Power Platform

Microsoft Power Platform is a low code platform that enables your business to craft solutions while empowering you to unite customized technology to help everyone.

Microsoft Azure

Host your workloads and build your own solutions on top of Microsoft Azure

Popular Services

- Virtual Machines**
- Storage**
- Databases**
- Web Applications**
- Machine Learning & AI solutions**

Dynamics 365

Business applications to help you manage your business

Different products to manage

Sales Operations

Customer Service

Human Resources

Finance & Operations

Supply Chain Management

Power Platform

Enable business users to create awesome solutions without a single line of code!

- **Power BI**
 - **Business Intelligence**
- **Power Automate**
 - **Workflows & RPA**
- **Power Virtual Agents**
 - **Chatbots**
- **Power Apps**
 - **Desktop & mobile apps**

Microsoft 365

Cloud offering focused around productivity solutions

Microsoft 365 is the cloud solution that most information workers will use daily

Popular services

Microsoft 365 Apps

Microsoft Teams

SharePoint

OneDrive

Overview of Microsoft 365 Licensing

Microsoft 365 Licensing Is Flexible

Microsoft 365 is a Software-as-a-Service offering

- Nothing to install / deploy
- Buy the license and you are good to go

Multiple license options – each with different things included

- Microsoft 365 licenses
- Office 365 licenses
- Standalone product licenses
- Add-Ons

Licensing is per user / per month

Licensing can get very complicated! We'll cover the basics – but always check with your licensing professional!

Microsoft 365 Includes Three Main Components

Office 365

Cloud Productivity Services (SharePoint, OneDrive, Teams, etc.)

Microsoft 365 Apps (previously called Microsoft Office)

Windows

Windows license for your Desktops / Laptops

Enterprise Mobility + Security (EMS)

Set of Security, Compliance, and Identity features for Microsoft 365. Includes features such as Azure AD Premium, Intune, & more!

Microsoft 365 Versions

E5
57\$/user/month

- Office 365 E5
- Windows 11 E5
- Enterprise Mobility + Security E5

E3
36\$/user/month

- Office 365 E3
- Windows 11 E3
- Enterprise Mobility + Security E3

F3
8\$/user/month

- Office 365 F3 (*extra limitations such as 1TB OneDrive / 2 GB Mailbox / Microsoft 365 apps can only be installed on mobile devices*)
- Windows 11 E3
- Enterprise Mobility + Security E3

F1
2.25\$/user/month

- Limited Office 365 Services
- Enterprise Mobility + Security E3

Not Everyone Needs the Same License

Not every company – or every user in the company needs the same license

- **Some users might only need an Office 365 license since they don't work on a computer**

Office 365 also has multiple versions

- **E1 / E3 / E5 / F3**

Customize your licenses to fit your organization needs

- **Licenses for as low as 2.25\$ / user / month**

Conclusion

Azure Active Directory is now Microsoft Entra ID

New name, same powerful capabilities!

Microsoft 365 Defender is now Microsoft Defender XDR

Name for Defender products inside the suite did not change

Microsoft Defender XDR

Supercharge your SecOps effectiveness with XDR

Get incident-level visibility across the cyberattack chain with Microsoft Defender XDR (formerly Microsoft 365 Defender). Take your SOC team to the next level with automatic disruption of advanced cyberattacks and accelerated response across endpoints, identities, email, collaboration tools, software as a service (SaaS) applications, cloud workloads, and data.

Endpoints

Discover and secure endpoint and network devices across your multiplatform enterprise.

Identities

Manage and secure hybrid identities and simplify employee, partner, and customer access.

Cloud apps

Get visibility, control data, and detect cyberthreats across cloud services and apps.

Email and collaboration tools

Protect your email and collaboration tools from advanced cyberthreats, such as phishing and business email compromise.

Name Changes Impact

The product name changes have no impact on the features you will learn in this course

Many internal and external resources might still use the old names of the products
