# Overview

**Introduction to business process flows**

**Business Process Flow in action**

# Introduction to Business Process Flows

---

# Business Process Flows

**A business process flow is a series of ordered work steps that a user completes within a business process**

# Business Process Flows (BPF)

**Guide a user through the steps of the process**

- **Everyone follows same steps**
- **All required data is filled**
- **Add logic depending on data**
- **Different experiences depending on security roles**

**Provide a visual indicator of the progress**

**Reduce training requirements for new processes**

# Steps

# Flow step

# Business Process Flows Benefits

**A visual guide for a  
process**

**Stages and steps**

**Stage gating**

**Conditional  
branching**

**Integration with  
Dataverse**

# Two Types of Business Process Flows

## **Embedded**

Embedded within a  
model-driven app

## **Immersive**

Immersive  
Stand-alone solution

# Leverage Other Power Platform Products

**Business process flows work with:**

**Microsoft Dataverse**

**Model-driven Power Apps**

**Some artifacts need to be part of solutions**

**We won't cover those in depth in this course**

**There is great content on Pluralsight on those!**

# Business Process Flow in Action

---

# Before You Get Started

## The tech part is easy

- Designing the business process on paper with your stakeholders is the hard part

Make sure you design your business process on paper before creating the flow

## Technical requirements

- Dataverse table & columns must be created
  - You can use an existing built-in table

# Our Scenario

**Globomantics Hotel wants to build a business process flow to ensure a common process is followed to clean hotel room between guests. This process should also ensure maintenance gets notified if anything is broken or needs replaced.**

# Demo

**Business Process Flows in action!**

# Conclusion

## **Introduction to business process flows**

- Guide a user through the steps of the process

## **Business Process Flow in action**

- Stages
- Steps
- Conditions
- Flow steps
