Regulatory Compliance for IT Professionals

Set of digital security requirements and practices

Ensure that a company's business processes are secure

Usually done to satisfy a third party

- Government
- Security framework
- Client

Compliance in the Cloud

**Security in the cloud is a partnership
So is compliance!**

**Part of the requirements will be done by
Microsoft**

**Microsoft will provide the documentation/
proof of it for you**

A lot of it depends on you

Overall compliance score

Your compliance score: 75%

12159/16167 points achieved

Your points achieved ⓘ
0/ 4008

Microsoft managed points achieved ⓘ
12159/ 12159

Compliance score measures your progress towards completing recommended actions that help reduce risks around data protection and regulatory standards.

Microsoft's Six Key Privacy Principles

Control

We will put you in control of your privacy with easy-to-use tools and clear choices.

Transparency

We will be transparent about data collection and use so you can make informed decisions.

Security

We will protect the data you entrust to us through strong security and encryption.

Strong legal protections

We will respect your local privacy laws and fight for legal protection of your privacy as a fundamental human right.

No content-based targeting

We will not use your email, chat, files or other personal content to target ads to you.

Benefits to you

When we do collect data, we will use it to benefit you and to make your experiences better.

Service Trust Portal

The Service Trust Portal is a single location where you can find audit reports, Pen Tests, Security Assessments, and more information on how Microsoft manages security, privacy and compliance.

Microsoft Purview Unified Data Governance

New

Welcome to Microsoft Purview

Govern and protect the data across your entire data estate

Microsoft Purview has a new look and capabilities that make it easier than ever to govern and protect your data. Start your journey with these capabilities:

- ✓ Automatically inventory data in Microsoft Azure, and Microsoft Fabric
- ✓ Explore your data in a searchable Data Catalog
- ✓ Identify and protect your sensitive and business-critical data

Try Microsoft Purview out and let us know what you think. By proceeding, you acknowledge the [Preview Terms](#) and [Privacy Statement](#)

☐ Don't show this again

Try now

[Microsoft Purview & Fabric](#)

Many organization have data outside of Microsoft 365

- SQL Servers
- Blob Storage
- Amazon S3
- Etc.

Microsoft Purview unified data governance enables you to inventory, identify, and protect your business-critical data wherever it is

Insider Risk Management

Microsoft Purview Insider Risk Management is a compliance solution that helps minimize internal risks by enabling you to detect, investigate, and act on malicious and inadvertent activities in your organization

Information Barriers

Microsoft Purview Information Barriers (IB) is a compliance solution that allows you to restrict two-way communication and collaboration between groups and users in Microsoft Teams, SharePoint, and OneDrive. Often used in highly regulated industries, IB can help to avoid conflicts of interest and safeguard internal information between users and organizational areas.

Azure Resource Locks

Azure resource locks are a feature of Azure Resource Manager

- Deployment and management service for Azure

Azure resource locks allows you to lock a resource to prevent accidental modification or deletion

- This is in addition to Azure role-based access control

Azure Policy

Helps enforce organizational standards and assess compliance at scale

A policy is made of business rules

- JSON policy definitions

Multiple business rules can be grouped together to form an initiative

- Makes deployment easier

Can be deployed at multiple levels

- Subscriptions
- Resource groups
- Individual resources

The screenshot shows the Pluralsight profile of Vlad Catrinescu. The profile includes a circular profile picture of a man with a beard and short hair, wearing a black shirt. To the right of the picture, the name "Vlad Catrinescu" is displayed in white, followed by a microphone icon. Below the name, it says "Pluralsight Author | 7088 Followers". A paragraph of text describes Vlad as an Office 365 consultant helping organizations get the most out of their Microsoft 365 Digital Workplace. It mentions his focus on helping administrators deploy, manage, automate, and configure governance across services like SharePoint, OneDrive for Business, and Microsoft... A link "Show All" is provided. Below the text, there are icons for Twitter and LinkedIn, followed by the URL "https://vladtalkstech.com/". On the right side of the profile, there is a red "Follow" button with a mouse cursor pointing at it. Below the button, the rating "4.6/5" is shown, with "Total ratings 3,636" underneath. At the bottom of the profile, it says "Content Authored (74)" and "TOPICS: (5)". Below this, there are five topic tags: "IT Ops", "Software Development", "Generative AI", "Cloud", and "Business". The top navigation bar of the Pluralsight app is visible, showing icons for Home, Browse, Search, Skill IQ, Certifications, Paths, Channels, Bookmarks, and a user profile icon.
